### PROFILE

I am an aspiring blockchain developer with skills in Solidity and Full Stack Web Development. I have prior experience in web application development with Laravel. I am deeply passionate about web 3 and the innovation of new systems in web 3 to solve challenges in society. I am a team player and a fast learner with strengths in adaptability and accuracy.

My hobbies are hiking, socializing, and listening to music. I also love solving programmatic challenges, especially on the codewars website.

### EDUCATION

**Bachelor of Science in Informatics and Computer Science | Strathmore University, Kenya**

APRIL 2019 – SEPTEMBER 2023

Currently pursuing a degree in informatics and computer science, have received cisco certifications, and acquired skills in computer hardware manipulation, software development, and data handling.

**Kenya Certificate of Secondary Education | Alliance High School**

MARCH 2015 – NOVEMBER 2018

Attained a mean grade of A- with an A in mathematics, B+ in English, and A in Computer studies.

### EXPERIENCE

**Voluntary Teacher and Lab Technician | St Joseph Cafasso Consolation House**

JANUARY 2020 – MARCH 2020, APRIL 2021

I was a volunteer teaching the students at the high school level, while also serving as the lab technician for the institution. It was a center for giving a second chance to young ex-convicts of Kamiti maximum prison.

**Attachment at the Office of The President, POMAC**

FEBRUARY 2022 – APRIL 2022

Completed a 3-month attachment at the Power of Mercy Advisory Committee under the Office of the President. Involved in the testing, debugging, and deploying of the Electronic Petition Management system which was launched by the AG.

## Campus Ambassador at Web3Learn

JULY 2022 – PRESENT

I am a Campus Ambassador on the Web3Learn Platform. I am tasked with involving students in learning web 3 through conducting workshops, organizing web 3 events, and digital marketing.

## Junior Developer at wufwuf

JULY 2022 – PRESENT

Joined the wufwuf startup which is a purely peer-to-peer betting platform that will allow online betting between people without the need for a centralized institution. The startup is currently accepted in the L\_Bank & Adanian Labs Crypto Accelerator Program.

## Freelancer | self-employed

JANUARY 202 – PRESENT

I teach coding and blockchain concepts.

## SKILLS

- Solidity
- HTML
- Hardhat
- JavaScript
- CSS
- Git and GitHub workflow
